

Libraries

Sierra **Logic** has developed many libraries during the course of proving solutions to their customers and have (or will) released them for the community to use.

Clojure

[Coax](#) - Coax is a Clojure library that generates and routes REST API via canonical OpenAPI file(s).

[Diction](#) - Diction is a Clojure library similar to spec but with added functionality and batteries included.

[Templar](#) - Templar is a Clojure library for dependency inversion.

[Tophat](#) - Tophat is a Clojure library for handling HTTP request and response documents/maps.

[Xander](#) - Xander is a Clojure library for transforming XML to/from more idiomatic Clojure maps.
